BN Series

Black Neoprene Plugs

Purpose

Black Neoprene Plugs are designed to plug plain and threaded holes; they will mask off the hole and allow finishing up to it.

How the product is used

The plug is tapered and is applied by pushing the smaller diameter into the hole. The plug is removed by pulling on the larger diameter.

The hole can be a blind hole or a through hole.

Recommended for

Plating, Anodizing, Spray painting, Blasting

Temperature range

Maximum temperature 350°F (177°C)

Storage conditions

Items should be stored in dry conditions at an ambient temperature of between 55°F (13°C) and 85°F (30°C). It is important to rotate stock and use the product in the order that it is received.

Design features

- **Tapered** - The plug is tapered and can be fitted into a range of different diameters
- **Flexibility** - The material is soft and conforming. This allows the plug to seal the hole
- **Reusable** - The plugs are reusable depending on the application
- **Carbon** - The BN series plugs contain carbon, which can assist some plating operations
- **Identification** - The Shercon name is on the product

Custom sizes and colors

Custom sizes are available of this design. Custom colors are available; however, they are subject to a minimum order quantity.
