# SRT Silicone Rubber Tape

## Description

This tape is a wrapping tape it does not have an adhesive, but can bond to itself as it is wrapped around items. It will mask off the ends or sections of shafts and tubes. SRT tape can also be used to form a tough resilient void free insulation. SRT is contoured so that as it is spiraled around and along, it forms a consistent thick layer of tape.

## Recommended for

Powder coating, E-coating, Plating, Anodizing

## Temperature range

Maximum temperature 600°F (315°C)

## Storage conditions

Items should be stored in dry conditions at an ambient temperature of between 55°F (13°C) and 85°F (30°C). It is important to rotate stock and use the product in the order that it is received.

## Design features

- **Self Bonding** - The tape bonds to itself as it is wrapped around things
- **Contoured** - The tape is contoured so it can form a consistent thickness as it is being wrapped around things
- **Color Coded** - The tape is color coded to ease identification
